

Pipe Fabrications and Specialty Products for the Water and Wastewater Industry

Quality Water Products

South Barre, Mass.

One of the Prescott Companies

Estimating & Sales Dept.

We can offer pricing on all applicable products for treatment plants, pump stations, fish hatcheries, etc., such as flange pipe, wall pipes and sleeves, ductile iron flange fittings, all plant valves and other related items. We can provide full sets of line drawings pertaining to our products as well as detailed material lists with tag numbers. Please feel free to call today for an estimate on your next project.

Our veteran inside sales and estimating staff is a knowledgeable group with years of experience. We can provide a detailed item by item take-off for any size treatment plant or pump station, as well as assist you with technical help you may need along the way. Our job is to make sure that your next project goes smoothly.

Machine Shop

Our machine shop and its procedures are certified by N.S.F. to insure that flanged ductile iron pipe conforms to ANSI/AWWA C115/A21.15 and that our grooved pipe conforms to AWWA C606.

Our experienced staff of machinists and welders are capable of fabricating exactly what you need for any plant job.

We can fabricate flanged and grooved pipe from 3" through 42" in diameter and up to 20 feet in length. Fabricated pipe and fittings can be ordered to your exact dimensions and tagged prior to delivery to correspond with project drawings.

In addition to flanging, grooving, welding or drilling and tapping, our staff can custom fabricate specialty products needed for projects requiring something unique. Restrained joint ends, welded on bosses and beveled filler flanges are just a few things we can provide. Call us for any specialty needs you may have.

Product Lines

Pipe is fabricated with different end configurations and in sizes 3" to 42" and in lengths up to 20 feet. Fabricated pipe is bundled and packaged for shipment to the jobsite.

We fabricate many specialty products such as beveled filler flanges, glass lined wall pipes, large diameter restrained joint pipe and welded-on bossed outlets.

We have a complete line of valves for plant projects. Our warehouse stocks check valves, both standard and cushioned. We also stock gate and plug valves as well as butterfly valves, control valves and air vacuum relief valves.

We have an extensive stock of ductile iron flanged and grooved fittings, which can be provided with a variety of coatings and linings.

We can provide large flanged fittings through 60" in diameter.

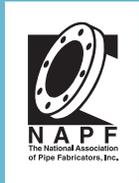

QWP carries an extensive inventory of items that are used in most plant project, such as flexible couplings, flange adaptors, tapped flanges, Victaulic couplings, flange accessories and expansion joints etc. QWP is a full-line distributor of Victaulic products.

Employees and Facility

Quality Water Products, a division of E.J. Prescott Company, is a well established pipe fabrication facility. We have been supplying process piping to the water and wastewater industry since 1978.

We are a member of the National Association of Pipe Fabricators. This means we are third party inspected by N.S.F. to insure the highest quality workmanship and full compliance with ANSI/AWWA standards. Always look for the NAPF logo.
